

THE DEVIL IS IN THE DETAILS

Brian Colgan, President, CSC

And that's where WHW Associate and Senior Project Manager, Brian Colgan, does battle every day.

He must be winning, because he's just been elected national President of Construction Specifications Canada. Brian brings nearly 40 years of experience writing specifications to his new role, believing good communications are necessary to build quality into organizations and successful construction projects. Congratulations, Brian.

We know how you love it when a plan comes together.
